wirewheel

A Comprehensive Platform for Building and Managing Privacy Programs

WireWheel helps companies of any size and complexity build and manage cutting-edge and scalable privacy programs. Our cloud-based Data Privacy & Protection Platform is built by privacy experts using industry best-practices to help organizations simplify, structure, and automate their approach to privacy program management.

WireWheel helps organizations:

- Produce required documentation for regulators, business operations, potential customers and vendors based on your requirements

- Provide notice to customers about what data you are collecting, why you are collecting it, where you are storing and processing the data, and with whom you are sharing the data

- Fulfill subject rights request requirements through an end-to-end platform that helps simplify, structure, and automate request management

- Maintain ongoing compliance with today's CCPA and GDPR requirements while being able to leverage your work to fulfill any future regulatory changes or new privacy regimes

WireWheel Privacy and Data Protection Solutions

Subject Rights Requests

Data Discovery and Classification

The WireWheel Difference

Our goal is to help you build a privacy program that goes beyond mere compliance and mitigates your legal, business, and reputational risks. We do this by offering industry-leading solutions and developing a long-term relationship with our clients so we can work jointly to help you manage a privacy program that drives business value for your company.

Mitigate Risk

Create a cutting-edge and scalable privacy program that helps you accurately assess risk across your entire organization and leverages tools and industry best practices to implement solutions that help you address key privacy challenges.

Save Time and Money

The WireWheel Platforms lets you leverage automation and pre-configured workflows to free up valuable time and resources, and reduce the costs associated with managing your privacy program.

Stay Ahead of Regulations

Our solution is built by industry experts who live and breathe privacy to help you. We've combined years of experience, industry best practices, and continuing conversations with regulators, business leaders, and other experts into a solution that remains up to date through ongoing agile development, navigating the complex and ever-changing regulatory requirements for you.

"

We explored a number of privacy solutions and WireWheel was the clear choice. Its innovative and thoughtful approach to a complex challenge is one that has delivered centralized visibility and game-changing efficiencies. The central data mapping feature has also delivered some unexpected returns on the investment, making the whole relationship with WireWheel a value driver, not only to our privacy program, but to the business at large."

About WireWheel

The WireWheel team is comprised of privacy experts, data scientists, cloud ninjas, PhDs, policy wonks and others who care deeply about data, privacy and building trust in the digital era. WireWheel's Privacy Management Platform equips privacy, security and IT professionals to quickly answer the four central questions at the heart of any privacy initiative: what data you have, why you have it, where that data is stored and processed, and with whom are you sharing that data with and for what purpose.
