# MAKING YOUR PRIVACY PROGRAM AI-READY

*Practical Ways to Leverage Privacy Compliance for AI Regulations*

November 12, 2025

# Meet the Presenters

**Cecilia Jeong**  
Data Privacy Attorney  
[cjeong@gunder.com](mailto:cjeong@gunder.com)

**Frida Alim**  
Data Privacy Attorney  
[falim@gunder.com](mailto:falim@gunder.com)

**Leila Golchehreh**  
Co-Founder & Chief Strategy Officer  
[leila@relyance.ai](mailto:leila@relyance.ai)

# Clear Leader for the Innovation Economy

Gunderson Dettmer has decades of experience representing high-growth companies in their financings, IPOs and M&A transactions, and throughout their lives as public companies.

**400**

attorneys in  
11 global markets

**#1 GLOBALLY**

most active law firm for venture capital  
financings every year since 2014  
(PitchBook)

**500+**

venture capital and  
growth equity firm clients

**4,500+**

company clients in the innovation  
economy worldwide

**1,800+**

venture financings  
for companies  
closed since 2022

**\$29B+**

raised in venture  
financings for  
companies since 2022

**300+**

M&A transactions  
globally since 2022

# Agenda

## 1. Setting the Regulatory Stage

2. Assessing the Applicability of AI Laws

3. Leveraging Existing Infrastructure for AI Compliance

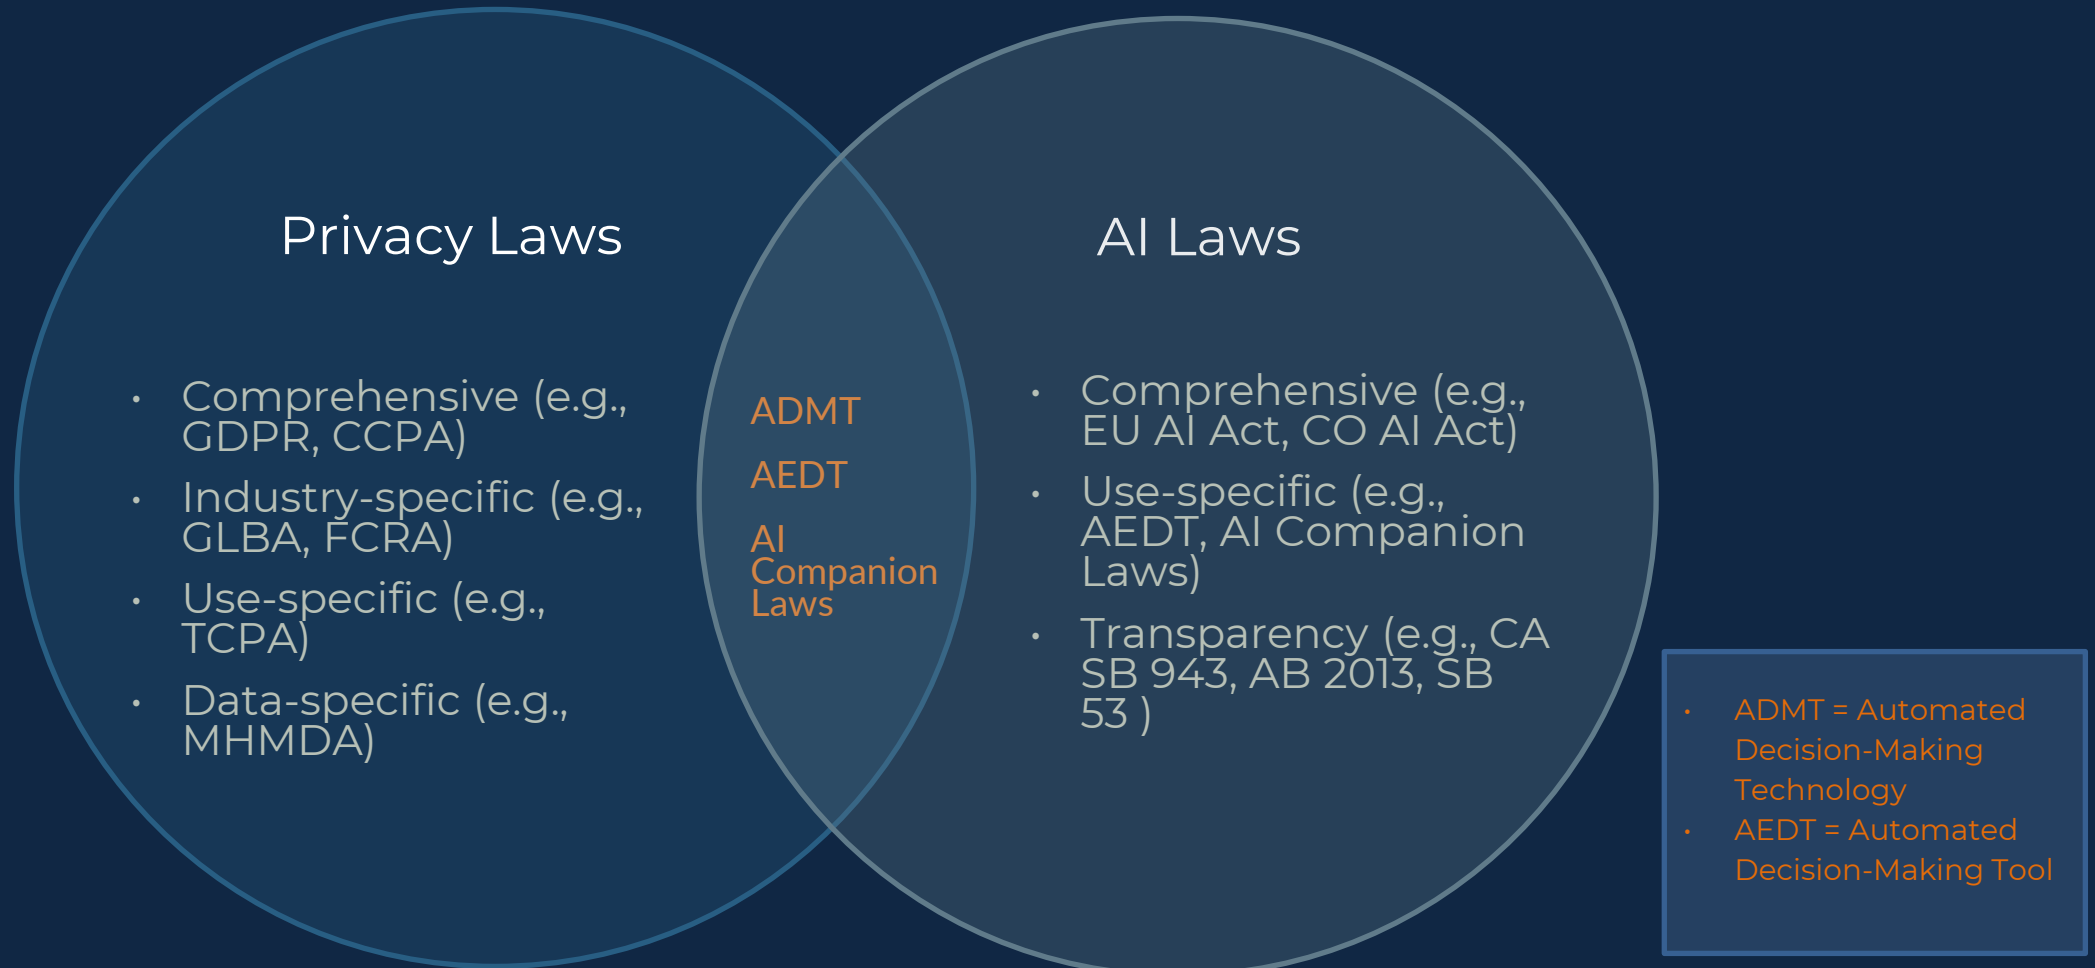

4. Additional Considerations under AI Laws

5. Top 5 Takeaways

6. Q&A

# Setting the Regulatory Stage

## Intersection of Privacy and AI Laws

# Setting the Regulatory Stage

## Timeline of AI Laws

# Agenda

1. Setting the Regulatory Stage

**2. Assessing the Applicability of AI Laws**

3. Leveraging Existing Infrastructure for AI Compliance

4. Additional Considerations under AI Laws

5. Top 5 Takeaways

6. Q&A

# How are companies approaching this mess?

1. Understand high risk areas
2. Assess applicability
3. Develop your AI posture
4. Consider common compliance areas

# Understand High Risk Areas

| Area  | Core High-Risk Examples   |
|---|---|
| <b>Biometrics</b>                             | Remote biometric identification (real-time or post-event, with limited exceptions). Biometric categorization based on sensitive or protected attributes (e.g., race, political opinion).  |
| <b>Critical Infrastructure</b>                | AI used as a safety component for the management and operation of road traffic, water, gas, heating, electricity, or critical digital infrastructure.                                     |
| <b>Education &amp; Training</b>               | AI used for determining access to educational institutions or for evaluating learning outcomes (e.g., grading, exam proctoring).  |
| <b>Employment &amp; HR</b>                    | AI used for recruitment, candidate screening, evaluating performance, task allocation, or making decisions about promotion/termination.   |
| <b>Financial &amp; Essential Services</b>     | AI used to evaluate creditworthiness (credit scoring, excluding fraud detection) or to evaluate eligibility for essential public assistance/benefits (e.g., healthcare, social services). |
| <b>Law Enforcement</b>                        | AI used for assessing the risk of an individual becoming a victim or re-offender, evaluating the reliability of evidence, or using polygraphs.  |
| <b>Migration, Asylum &amp; Border Control</b> | AI used to assess the security or irregular migration risk of a person or to assist in the examination of visa, asylum, or residence permit applications.                                 |
| <b>Justice &amp; Democratic Processes</b>     | AI intended to assist judicial authorities in searching for, interpreting, or applying law and facts, or to influence the outcome of elections/referenda.                                 |

# Assessing Applicability

**Establish a Centralized AI Inventory + Map / Registry:** Conduct an inventory of AI systems to eliminate "Shadow AI" and track their risk tier.

- Consider internal and external uses
- Don't forget your vendors
- If feasible, work with a technology partner

**Risk-Tiering – Both for Internal AI and External Third-Party Vendors, as well as Generative AI:** Classify all in-house AI based on impact level (e.g., High-Risk, Customer decisions) to align mandatory oversight and review.

**Third-Party Due Diligence:** Integrate assessments into Vendor Risk Management (VRM) to audit how vendors use AI and what our data feeds into their systems.

# Developing Your AI Posture

| Developer   | Deployer  |
|---|---|
| <ul style="list-style-type: none"><li>• Develops or substantially modifies an AI system</li><li>• Sells, licenses, or makes it otherwise commercially available for use</li></ul> | <ul style="list-style-type: none"><li>• Implements, puts the AI system into use, or uses AI system</li><li>• Typically determines use (e.g., to make consequential decisions)</li></ul> |

# Common Compliance Areas

1. Transparency
2. Data subject rights (e.g., consents, opt-outs)
3. Risk assessments
4. Regular audits
5. Vendor management/flow down obligations

# Agenda

1. Setting the Regulatory Stage
2. Assessing the Applicability of AI Laws
- 3. Leveraging Existing Infrastructure for AI Compliance**
4. Additional Considerations under AI Laws
5. Top 5 Takeaways
6. Q&A

# Leveraging Existing Infrastructure for AI Compliance

| Framework Component | Privacy Law Processes   | AI Law Processes   | Leveraging Privacy Processes for AI Compliance  |
|---------------------|---|--|---|
| Risk identification | <ul style="list-style-type: none"> <li>• Data maps</li> <li>• PIAs</li> <li>• DPIAs</li> <li>• Legitimate interest assessments</li> </ul> | <ul style="list-style-type: none"> <li>• Impact assessments (e.g., COAIA)</li> <li>• Bias audits (e.g., NYC 144)</li> </ul>  | <p>Leverage the following from privacy law processes:</p> <ul style="list-style-type: none"> <li>• Mapping of data flows</li> <li>• Cataloging of risks</li> <li>• Risk mitigation strategies</li> </ul>  |
| Transparency        | <ul style="list-style-type: none"> <li>• Notice at collection</li> <li>• Privacy policy</li> <li>• Just-in-time notices</li> </ul>        | <p>For developers:</p> <ul style="list-style-type: none"> <li>• Disclosure of training data (sources, types) used to develop genAI models (CA Training Data Transparency Act).</li> <li>• On website, disclosure of (i) high-risk systems developed or made available, (ii) risk management for discrimination (COAIA).</li> </ul> <p>For deployers:</p> <ul style="list-style-type: none"> <li>• Disclosure that consumer is interacting with AI system (various laws).</li> <li>• For high-risk AI systems, notification to consumer before a consequential decision is made (e.g., COAIA, CCPA).</li> </ul> <p><i>Note that some laws require specific documentation be made available to regulatory bodies (e.g., COAIA, EU AI Act).</i></p> | <ul style="list-style-type: none"> <li>• Ensure AI notices align with existing privacy notices</li> <li>• Supplement privacy notices with AI disclosures (e.g., appeals process, data subject rights, where to submit AI related inquiries)</li> <li>• Consider appropriate placement/timing for presenting AI-related notices</li> </ul> |

# Leveraging Existing Infrastructure for AI Compliance

| Framework Component    | Privacy Law Processes   | AI Law Processes  | Leveraging Privacy Processes for AI Compliance   |
|------------------------|---|---|--|
| Vendor Management      | Processor flow-down terms, e.g.: <ul style="list-style-type: none"> <li>• Data use restrictions</li> <li>• Data retention</li> <li>• Sub-processor notifications</li> <li>• auditing/oversight</li> </ul>   | Same + restrictions on: <ul style="list-style-type: none"> <li>• Data use and training</li> <li>• Retention (e.g., ZDR)</li> </ul>  | Leverage and supplement existing vendor questionnaires with Qs on: <ul style="list-style-type: none"> <li>• Whether vendor is a provider or deployer</li> <li>• Whether AI is “high-risk”</li> <li>• Training data sources (will data we provide be used?)</li> <li>• The vendor’s data governance framework</li> </ul>  |
| Data subject rights    | <ul style="list-style-type: none"> <li>• Right to access</li> <li>• Right to correct</li> <li>• Right to delete</li> <li>• Right to opt-out of selling/sharing</li> <li>• Right to appeal</li> </ul>  | <ul style="list-style-type: none"> <li>• Right to correct data</li> <li>• Right to appeal adverse consequential decision (+ human review)</li> <li>• Right to opt-out of automated profiling by high-risk AI systems</li> </ul> | Reuse privacy DSR workflows to handle access/opt-out rights and appeal pathways while noting deviations in: <ul style="list-style-type: none"> <li>• Timelines for responding</li> <li>• When/where to offer DSR mechanisms</li> </ul>   |
| Stakeholder Engagement | Consult with: <ul style="list-style-type: none"> <li>• Engineering (data scientists, cyber)</li> <li>• Marketing/Sales (e.g., prospecting tools, recording tools)</li> <li>• Executive leadership/board</li> <li>• Legal</li> <li>• Security</li> <li>• Human resources</li> <li>• Procurement</li> </ul> | Similar.  | Same group, new questions, e.g.: <ul style="list-style-type: none"> <li>• Where is this model sold?</li> <li>• What is the purpose of the model?</li> <li>• How is the model being used and intended to be used?</li> <li>• How was the AI model trained and validated? What are the outputs?</li> <li>• What are the model’s limitations and risks?</li> <li>• Is it obvious to users that they are dealing with AI?</li> </ul> |

# Leveraging Existing Infrastructure for AI Compliance

## *Bridging PIAs and AI Risk Assessments*

| Traditional PIA Components:  | AI Risk Assessments:   |
|--|--|
| <ul style="list-style-type: none"><li>• Map data flows</li><li>• Describe the processing: the how and why</li><li>• Describe the context and purpose of the processing</li><li>• Identify the source of risk and nature of potential impact on individuals</li><li>• Necessity and proportionality of processing</li><li>• Risk mitigation (safeguards, security measures)</li></ul> | <ul style="list-style-type: none"><li>• Map data flows (including training data, inputs and outputs)</li><li>• Describe the processing (purpose, intended use cases, benefits)</li><li>• Identify metrics and known limitations</li><li>• Identify known or reasonably foreseeable risks of algorithmic discrimination</li><li>• Risk mitigation</li><li>• Transparency mechanisms for explainable AI</li><li>• Post-deployment monitoring and user safeguards, including oversight, use and learning processes to address issues from deployment.</li></ul> <p><b>Timing (for CO AI Act):</b> Before deploying or substantially modifying a high-risk AI system, then, at least annually and within 90 days after any substantial modification.</p> |

# Agenda

1. Setting the Regulatory Stage
2. Assessing the Applicability of AI Laws
3. Leveraging Existing Infrastructure for AI Compliance
- 4. Additional Considerations under AI Laws**
5. Top 5 Takeaways
6. Q&A

# Additional Considerations under AI Laws

**Explainability**

**Bias & Non-Discrimination**

**Safety & Risk Management**

**Accuracy & Hallucinations**

**Accountability, Reliability & Control**

**Transparency of Content**

**Ethics & Data Governance**

# Agenda

1. Setting the Regulatory Stage
2. Assessing the Applicability of AI Laws
3. Leveraging Existing Infrastructure for AI Compliance
4. Additional Considerations under AI Laws

## **5. Top 5 Takeaways**

6. Q&A

# Top 5 Takeaways

## 1. Knowledge is power

- Understand how AI is leveraged by your business
- Understand data use

## 2. Teamwork makes the dreamwork

- Work with your stakeholders
- Engage legal - internal and external
- Identify the tools available to you that can help

## 3. Simplify to amplify

- Develop your posture
- Identify your principles

## 4. Clarity through priorities

- Implement compliance measures by priority

## 5. Stay nimble

- Monitor and adjust as needed
- Compliance is a moving target as law and technology change

# List of AI Resources

## A. AI Courses

- a. [AI Academy \(IBM\)](#)
- b. [Google AI Essentials](#)
- c. [Coursera](#)

## B. Foundational Ethics & Frameworks

- ABA Law and AI Resources:
  - Essential guidance on professional responsibility and ethical duties for lawyers using Generative AI.
  - Link: [ABA Law and AI Resources](#)
- NIST AI Risk Management Framework (AI RMF):
  - The leading, non-sector-specific framework for establishing internal AI governance and compliance programs (referenced by the EU AI Act).
  - Link: [NIST AI RMF 1.0 \(via ABA\)](#)

## C. Key Certifications (Industry Standards)

- IAPP: AI Governance Professional (AIGP):
  - The premier certification demonstrating expertise in legal, ethical, and operational management of AI systems.
  - Link: [AIGP Certification - IAPP](#)
- Georgetown SCS: AI Governance & Compliance Certificate:
  - A comprehensive program for lawyers and compliance professionals covering global legal/ethical requirements.
  - Link: [Georgetown Certificate in AI Governance](#)

## D. Regulatory Tracking & Analysis

- Thomson Reuters Legal Insights:
  - Provides continuous expert analysis on risk mitigation, legal tech, and the intersection of AI with the legal profession.
  - Link: [Thomson Reuters Legal AI Tools](#)
